

KLove is such a positive influence in my life as well as my husband's. I listen to KLove every morning on my way to work and many other times during the day. It keeps my morning and evening commute calm and relaxed. If we were to lose this station, I believe the music & message with which it would be replaced would harm our community, especially our children. It is important to me there is an alternative on the radio to vulgar, sexual, and explicit music and talk shows for my children.
